NUMBER 1: JANUARY 1992

Tomographic inversion of normalized data: double-trace tomography algorithms. *Michael Dobroka, Lothar Dresen, Christoph Gelbke and Horst Rüter* 1
Pseudoreflections profiling method: an efficient complement to CDP method. *Tomoki Tsutsui* 15
Seismogram synthesis and recompression of dispersive in-seam seismic multimode data using a normal-mode superposition approach. *Monika Breitzke* 31
Parametrization of GRT inversion for acoustic and P-P scattering. *L. T. Ikelle, P. W. Kitchenside and P. S. Schultz* 71
Resistivity of rock-salt in Asse (Germany) and petrophysical aspects. *U. Yaramanchi and D. Flach* 85
Comments on 'Conversion points and traveltimes of converted waves in parallel dipping layers' by Gisa Tessmer and Alfred Behle. *David F. Aldridge* 101
Publications Received 105

NUMBER 2: FEBRUARY 1992

Borehole radar applied to the characterization of hydraulically conductive fracture zones in crystalline rock. *Olle Olsson, Lars Falk, Olof Forslund, Lars Lundmark and Eric Sandberg* 109
Separation of regional and residual anomalies by least-square orthogonal polynomial and relaxation techniques: a performance evaluation. *B. N. P. Agarwal and Ch. Sivaji* 143
Acoustic modelling on a grid of vertically varying spacing. *Cord Jastram and Alfred Behle* 157
Inversion of gravity and magnetic data for the lower surface of a 2.5 dimensional sedimentary basin. *Kevin L. Mickus and Wayne J. Peeples* 171
Shear-wave velocity estimation in porous rocks: theoretical formulation, preliminary verification and applications. *M. L. Greenberg and J. P. Castagna* 195
Seismic phase unwrapping: methods, results, problems. *A. P. Shatilo* 211
Natural smoothness constraints in cross-hole seismic tomography. *M. Pilkington and J. P. Todoeschuck* 227
Non-linear avo inversion for a stack of anelastic layers. *Terje Dahl and Bjørn Ursin* 243

NUMBER 3: APRIL 1992

Two-point ray tracing in general 3D media. *V. Pereyra* 267
Some fads and fallacies in seismic data analysis. *A. T. Walden and R. E. White* 289
A theoretical treatment of the effect of microscopic fluid distribution on the dielectric properties of partially saturated rocks. *Anthony L. Endres and Rosemary Knight* 307

Burger's equation as a model for the IP phenomenon. *J. Wyller, N. Wellander, F. Larson and D. Parasnis* 325
Plane-wave constraints in 2D filter design. *D. Waltham* 343
When 'least-squares' squares least. *M. Al-Chalabi* 359

NUMBER 4: MAY 1992

3D prestack depth migration in the Gulf of Suez: a case history. *P. G. Western and Dr G. J. Ball* 379
Slope data water-bottom multiple attenuation. *Arnim B. Haase* 403
The collocation approach to the inversion of the gravity data. *A. Barzaghi, A. Gandino, F. Sanso and C. Zenucchini* 429
Resolution of resistivity tomography inferred from numerical simulation. *Yutaka Sasaki* 453
Elastic redatuming of multicomponent seismic data. *C. P. A. Wapenaar, H. L. H. Cox and A. J. Berkhout* 465

NUMBER 5: JULY 1992

Seismic reflection amplitudes. *Bjørn Ursin and Terje Dahl* 483
Modelling channel waves with synthetic seismograms in an anisotropic in-seam seismic survey. *Enru Liu, Stuart Crampin and Bruce Roth* 513
The transient electromagnetic response of a polarizable sphere in a conducting half space. *Terry Lee and Lindsay Thomas* 541
Frequency-selective design of the Kirchhoff migration operator. *Samuel H. Gray* 565
Application of geoelectric methods using buried electrodes in exploration and mining. *P. Draskovits and A. Simon* 573

NUMBER 6: AUGUST 1992

Automated first arrival picking: a neural network approach. *Michael E. Murat and Albert J. Rudman* 587
Reflection and polarization of tube waves as seen in VSP data. *R. Mjelde* 605
The Cagniard method in complex time revisited. *N. Bleistein and J. K. Cohen* 619
IP response for a 2D horizontal cylinder. *B. B. Bhattacharya and D. Biswas* 651
Seismic modelling of seam waves excited by energy transmission into a seam. *R. Gritto and L. Dresen* 671

NUMBER 7: OCTOBER 1992

An integral equation for the geoelectric response of thin resistive bodies. *Peter Furness* 701
Modelling of GI gun signatures. *Martin Landrø* 605
Depth of detection of buried conductive targets with different electrode arrays in resistivity prospecting. *A. Apparao, T. Gangadhara Rao, R. Sivarama Sastry and v. Subrahmanya Sarma* 749
Anisotropic Q and velocity dispersion of finely layered media. *José M. Carcione* 761
Seismic horizon detection using image processing algorithms. *István Bondár* ... 785
Mapping of crustal discontinuities by wavelength filtering of the gravity field. *Kunal Chakraborty and B. N. P. Agarwal* 801
Comment on 'Aspects of charge-accumulation in D. C. resistivity experiments' by Y. Li and D. W. Oldenburg. *L. Szarka* 823

NUMBER 8: NOVEMBER 1992

Multiparameter geophysical logging at the Yava lead deposit: a statistical approach. *Anne Cinq-Mars, C. J. Mwenifumbo, P. G. Killeen and M. Chouteau* 829
Optimal estimation of crack-strike. *Colin MacBeth and Gareth S. Yardly* 849
Reflection amplitudes and migration amplitudes (zero-offset situation). *R. Bortfeld and M. Kiehn* 873
Fixed loop source EM modelling results using 2D finite elements. *Pierre Valla* 885
Integrated interpretation of marine engineering geological and geophysical data on the principles of expert system technology. *E. V. Kovalevsky and V. I. Kharchenko* 909
Comment on 'The resolution of narrow low-velocity zones with the generalized reciprocal method' by Derecke Palmer. *R. J. Whiteley* 925
Reply to comment by R. J. Whiteley. *Derecke Palmer* 933
Publications Received 937
